MBT—Where do we stand?

by Anne Kramer—Seppmed

Anne Kramer works as senior consultant and project manager at sepp.med gmbh, a service provider specialized in IT solutions with integrated quality assurance in complex, safety-relevant domains. She received her PhD in Physics at the Université Joseph Fourier in Grenoble (France). Anne started her career as software developer for smart card testing tools at Schlumberger Systems in Paris and soon became project manager for point of sales terminals. In 2001 she joined sepp.med where she specialized in quality assurance methods and IT development processes for the medical and pharmaceutical domain.

Anne is trainer for various certified training programs.
