Model-Based Testing for Beginners

by Eddie Jaffuel — eConsult

Eddie Jaffuel is an independent consultant, expert in Modeling and in Model Based Testing for 10 years.

He has worked as a pre-sales consultant of a Model-Based Testing solution in various domains (Automotive, IT and Smartcards)

He has developed an expertise in the smartcard industries from 2004.

He was involved, as technical lead and project manager for the Model-Based Testing technics, in different projects dealing with the smartcard industries:

- Test plan production for Health Card, SAGEM
- Test plan production for Identity Card, GEMALTO
- Test plan production for GlobalPlatform, Giesecke Devrient
- Funded project RNTL Project POSE (security testing in Smart-cards)
- Funded project RNRT Project POLITESS (security testing with MBT)
- Test plan production for GlobalPlatform, Consortium Global-Platform
- Test plan production for Contactless payment applications

In 2007, he has initiated the first delivery project of a test plan generated with a Model Based-Testing solution applied to GlobalPlatform, which is still ongoing and applied to new versions of the specifications.
