Test Harnessing—An automated Model-Based Testing approach

by Kailash Chanduka — Aris Global Software Pvt Ltd

Kailash Chanduka has worked in software industry for more than 15 years after completing his PhD in mathematics from IIT Kanpur, India. Currently, he heads the testing shared services at Aris Global Software, a leading pharmaceutical software product vendor,and is responsible for test strategy and test methodologies for functional as well as non-functional testing of Aris Global suite of products. Earlier he worked as a senior research associate to develop framework for automated test case generation and automated test execution. His current interest in software testing includes developing model-based testing methodology for enterprise software application.
