End-to-End and Interoperability Testing with MBT

by Kimmo Nupponen — Conformiq

Kimmo Nupponen works as Chief Engineer for Conformiq. He is leading Conformiq's R&D team and has overall responsibility of Conformiq's R&D operations. For the last almost a decade he has had a significant role in the definition and implementation of Conformiq Designer. Prior to joining Conformiq, Kimmo worked for SGI and the ESRF (European Synchrotron Radiation Facility) research institute. Kimmo holds M.Sc. Tech. degree from Helsinki University of Technology where he studied software systems and theoretical computer science.
