Application of MBT to validation of new nuclear I&C architectures

by Luc Coyette — Esterel Technologies

Luc COYETTE is Technical Director at Esterel Technologies. With a team of consultants, he is in charge of the technical support for customers based in France, Benelux and Scandinavia. He is expert in software development, testing, and model-based design.

From 2001 when he joined the company, he has delivered training and consulting activities to many customers on the usage of SCADE solutions for the development of safety critical systems in aerospace, defense, rail, nuclear, and industrial domains, in the respect of existing standards such as DO-178B, IEC 61508, EN 50128 or IEC 60880.
