End-2-End Testing of large-scale IT Information
Systems—MBT as an enabler
for functional (re)documentation
by Olivier Bussenot—Smartesting

Olivier Bussenot, consultant at Smartesting
With 15 years of experience in software development, quality and testing, Olivier is in charge of the presales activities at Smartesting with the mission of market evangelization around MBT. Involved in deployment projects, he also collects feedback and methodologies in order to leverage new practices in Smartesting users' community. He is specialized on MBT's side effects and benefits such as ROI studies, automation leverage, functional redocumentation, customer methodology adjustments, integrations to existing tools.
