

MUNICH, 16-18 September 2014

This year, the leading conference for software and embedded testing automation - User Conference on Advanced Automated Testing (UCAAT) - will be held in Munich, Germany

Munich, 28 July 2014 - From the 16th to 18th September 2014 the UCAAT conference will be held in Munich, Germany, and it will introduce the latest innovations and best practices from users for users in the ICT world.

The conference, jointly organized by ETSI Technical Committee "Methods for Testing and Specification" (TC MTS), QualityMinds and German Testing Day, does not include any sales pitch and therefore the speakers and the participants will be able to focus exclusively on use cases and best practices.

The interesting and practice-oriented program will open with an interactive session hosted by ETSI Technical Committee "Methods for Testing and Specification" (TC MTS) and moderated by Dr. Andrej Pietschker (Giesecke & Devrient). Other speakers in that panel include: Prof. Ina Schieferdecker (Free University of Berlin), Markus Becher (BMW), Dr. Heiko Englert (Siemens) and Prof. Dr. Alexander Pretschner (Technical University of Munich).

The Platinum Sponsors of the conference are Sepp.med and Siemens, whereas Gold Sponsors include: brightONE, Berner & Mattner, Conformiq, Ericsson, MBTech and Testing Technologies.

UCAAT 2013, which took place in Paris, attracted 200 participants and included 21 technical presentations held by renowned speakers, such as Professor Lionel Briand (University of Luxembourg) and Matthias Rasking (Accenture). It was the biggest and the most important conference for automated testing in Europe in the previous year.

This year, the organizers wish to repeat this success in Munich. The program includes talks on subjects such as: agile test automation, model-based tests, test languages and methodologies, as well as web of service and use of the test automation in the different branches (e.g., automotive field, medicine technology, security and protection in cyber-physical systems, etc.).

About ETSI

ETSI (European Telecommunications Standards Institute) produces globally-applicable standards for

Information and Communications Technologies (ICT), including fixed, mobile, radio, converged, aeronautical, broadcast and internet technologies and is officially recognized by the European Union as a European Standards Organization. ETSI is an independent, not-for-profit association whose more than 700 member companies and organizations, drawn from 63 countries across five continents worldwide, determine its work programme and participate directly in its work. www.etsi.org

About QualityMinds GmbH

"Quality is not a coincidence" – true to this motto, QualityMinds advise their clients on various topics, including test management, test automation and model-based testing. The combination of methodological knowledge and experience is the key to the company's success in software development projects. Their main focus lies in agile, offshore and mobile testing, management of test surroundings, as well as testing in large-scale projects. QualityMinds delivers expert test assessment combined with consulting services on subjects such as: requirements engineering, software architecture and roll-out management. www.qualityminds.de
