Methods for Testing & Specification

- MTS is an open, horizontal ETSI committee which is focusing on testing and specification independent of application areas

- MTS creates guidelines, frameworks, notations, and methodologies for specification and testing to efficiently develop standards and test specifications.

- MTS has 20+ years of experience and a unique reputation in creating global standards on testing and specification

- Interested? Get more information & contribute!

- Visit the ETSI booth orb http://portal.etsi.org/MTS !
