Smartesting

SMARTESTING SOLUTIONS & SERVICES

Who we are

A French technological company
A Model-Based Testing solution provider since 2003

Our markets

Enterprise IT applications

Embedded software (in particular in the e-Transaction industry)

Our ecosystem

Technological partners:

Deployment partners

Our flagship product, Smartesting **Certify-It** ®

A large range of expressivity with various modeling notations

- UML/OCL for embedded software
- BPMN for IT

A wide offer of connectors for upstream & downstream integration

- Import from Req management tools (HP-ALM, Doors, etc.) and from modeling editors (EA, Mega, Bizagi, etc.)
- Publication to HP-ALM, IBM RQM, TestLink, etc. and HTML, Excel, pdf..
- Publication for any automatic test execution tool

Innovative optional modules:

Impulse, an MBT transition accelerator that takes your existing test cases to reverse-engineer elements of the MBT Model

TOCL, an add-on intended to vulnerability testing: an effective way to express security functional requirements and increase the test coverage

MBeeTle an add-on intended to robustness testing: on-line fuzzing guided by the MBT model
