## Model-driven workflow applied to an IMS application server

by Antal Wu-Hen-Chang — Ericsson

Antal Wu-Hen-Chang received his MSc in Telecommunication and Telematics at the Budapest University of Technology and Economics in 2002. After graduation, he started working on his PhD. His research topics include formal languages and test generation, model-based testing, test data optimization.

Antal started working at Ericsson in 2004. He designed several TTCN-3 function test frameworks and participated in the development of a TTCN-3 based load test framework. He is currently a test engineer at the Test Competence Center at Ericsson Hungary.
