## Exploring Model-Driven Language Implementation of a Test Description Language

by Florian Philipp — University of Göttingen

Florian Philipp is a graduate student in the research group of Prof. Grabowski at the Institute of Computer Science at the Georg-August-Universität Göttingen, Germany. He is currently employed as a computer scientist at the German Aerospace Center in Göttingen. He received his B.Eng. in Information Technology from the Cooperative State University Baden Württemberg Mannheim and his M.Sc. in Applied Computer Science from the Georg-August-Universität Göttingen. His research interests are directed towards domain specific language development, workflow automation and test equipment development.
