Introduction to TTCN-3

by Theofanis Vassiliou-Gioles — Testing Technologies

Mr. Theofanis Vassiliou-Gioles, co-founder and CEO of Testing Technologies since 2000, began his professional career at the Fraunhofer Research Institute FOKUS. For a period of more than 6 years he was involved in projects for several test device vendors and in the standardization of conformance test suites for the ATM technology.

After gaining experience with the implementation of TTCN based test systems he became senior expert in testing and was subsequently assigned as Deputy Chief of Competence Centre for Testing, Interoperability and Performance.

Mr. Vassiliou-Gioles is involved in several standardization groups at ETSI, e.g. the TTCN-3 working group. He has published a number of papers on the application of TTCN-3 at various international conferences. He holds a Master in Electrical Engineering from Technical University Berlin.
