3RD EDITION OF ETSI UCAAT

INTERNATIONAL CONFERENCE DEDICATED TO ADVANCED AUTOMATED TESTING

Sophia Antipolis from 20 to 22 October 2015

Register at: http://ucaat.etsi.org/2015/

Call for speakers: deadline May 30

Sophia Antipolis – February 20, 2015 – ETSI has launched its 3rd international User Conference on Advanced Automated Testing, UCAAT, that will take place at Sophia Antipolis, from 20 to 22 October 2015.

"With mobile and cloud applications increasing, IT systems are entering a digital world, and that has created the need for more systematic and automated software testing. The world of testing is changing at a fast pace, and every year we can see how standards and technologies evolve to enable our companies to be more competitive. UCAAT offers the international community the opportunity to have an update on innovations and best practices among the users of advanced automated testing. This event is a must for test professionals today, as the success of the previous edition of UCAAT held in Munich in 2014 confirmed" commented Bruno Legeard, Chairman of UCAAT 2015 program.

Organized by ETSI's Technical Committee Methods for Testing and Specification (TC MTS), the conference will showcase the latest innovations in test automation, and will address many issues such as the standardization of the Test Description Language (TDL), but also test automation in agile environments, Model Based Testing, or mobile applications.

Over 250 experts and decision-makers on testing expected at Sophia Antipolis

UCAAT is dedicated to all quality and testing professionals whether they are developers, engineers, experts, project or quality managers. The event aims to introduce innovative approaches, methodologies, best practices and experience in use in the industry of advanced automated testing.

UCAAT will be organized around one day of tutorials and round table discussions and two days dedicated to various presentations, keynote speeches and poster sessions.

The exhibition area will facilitate networking and will offer exhibitors the opportunity to showcase their solutions and know-how to a targeted audience.

UCAAT 2015 milestones:

- **Now**: registration open at http://ucaat.etsi.org/2015/
- **30 May**: Abstract submission
- **8 July**: Program publication
- **28 September** : Submission of final presentations

SPONSOR UCAAT 2015:

A complete file for exhibitors and potential sponsors is available on the event's website. There are four levels of sponsorship available.

All information is available at: http://ucaat.etsi.org/2015/index.html **–**

About ETSI

ETSI produces globally-applicable standards for Information and Communications Technologies (ICT), including fixed, mobile, radio, converged, aeronautical, broadcast and internet technologies and is officially recognized by the European Union as a European Standards Organization. ETSI is an independent, not-for-profit association whose more than 700 member companies and organizations, drawn from 64 countries across five continents, determine its work programme and participate directly in its work.

In 2015, ETSI will be a partner of two major events in software testing: the French day of Software testing (Journée Française des Tests Logiciels), at Montrouge, 14 April, and the 10th STV (Workshop on Systems Testing & Validation), at Sophia Antipolis, 19 October.
