Advanced Automated Testing**
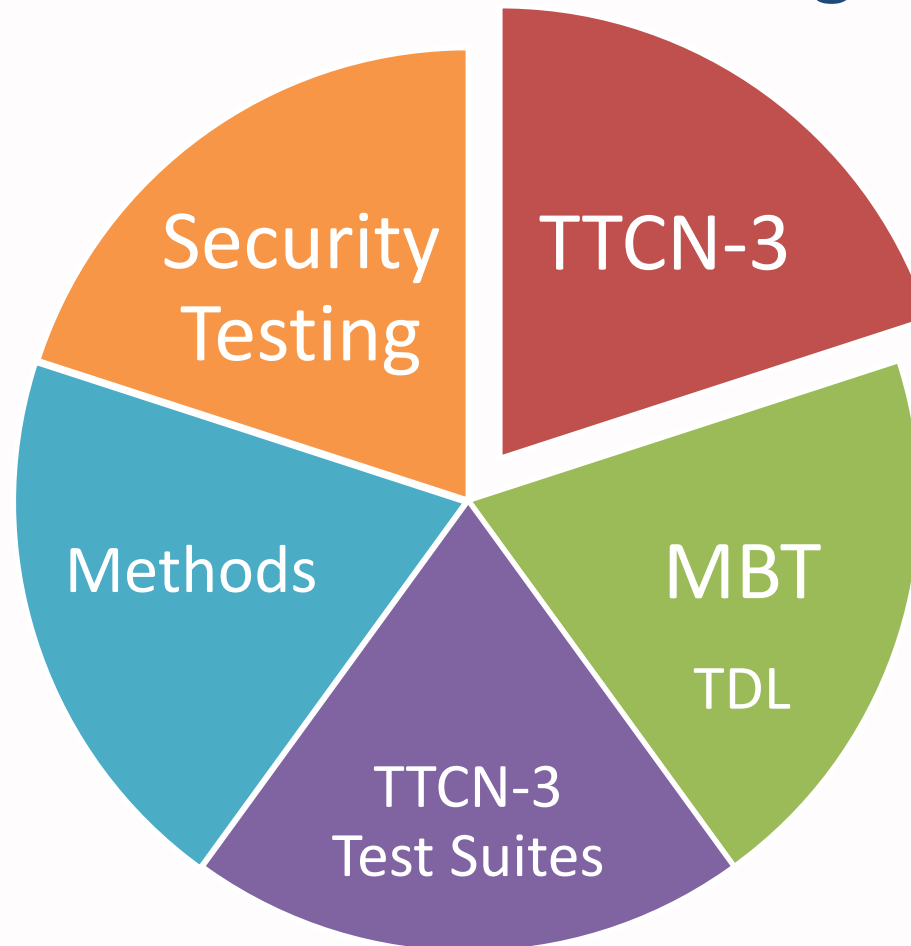

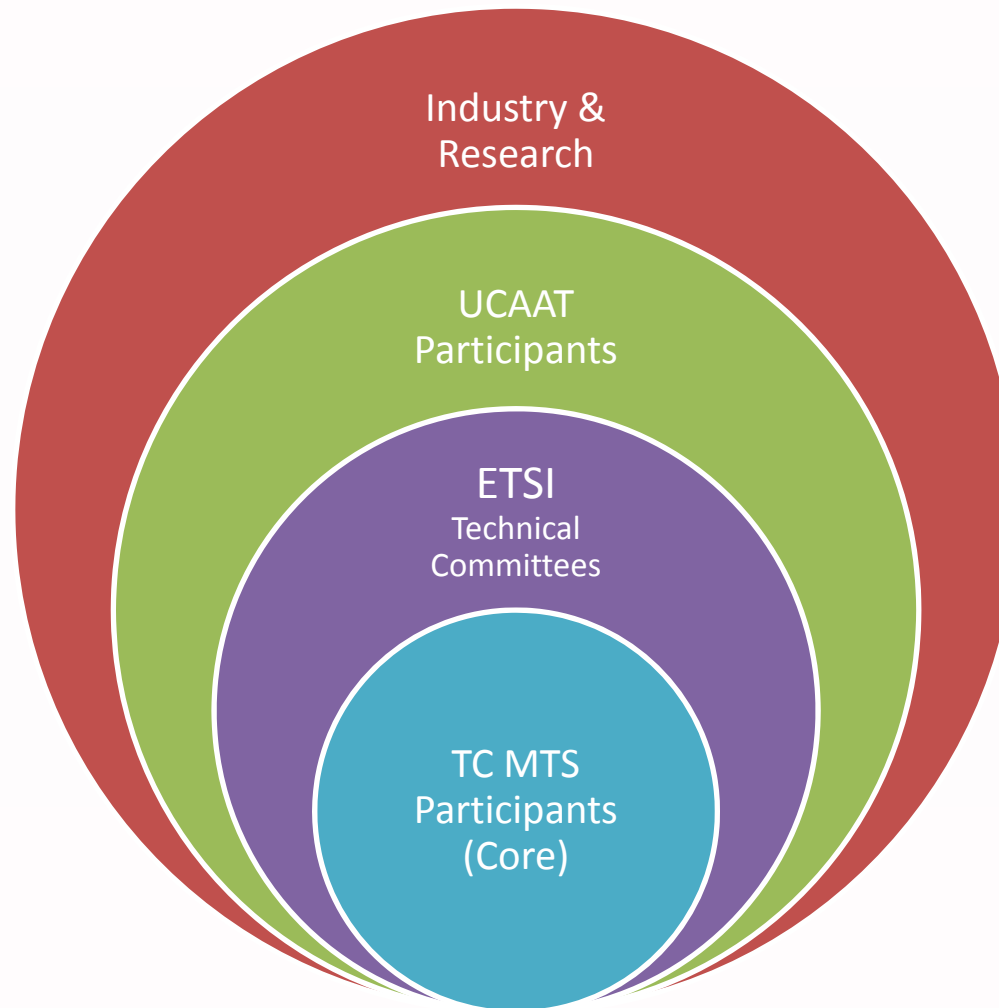

Who is ETSI Technical Committee MTS?

- MTS stands for Methods for Testing & Specification

- It is an open, horizontal ETSI technical committee which is focusing on testing and specification independent of application areas

- MTS creates guidelines, frameworks, notations, and methodologies for specification and testing to efficiently develop standards and test specifications

- MTS has 20+ years of experience and a unique reputation in creating global standards on testing and specification
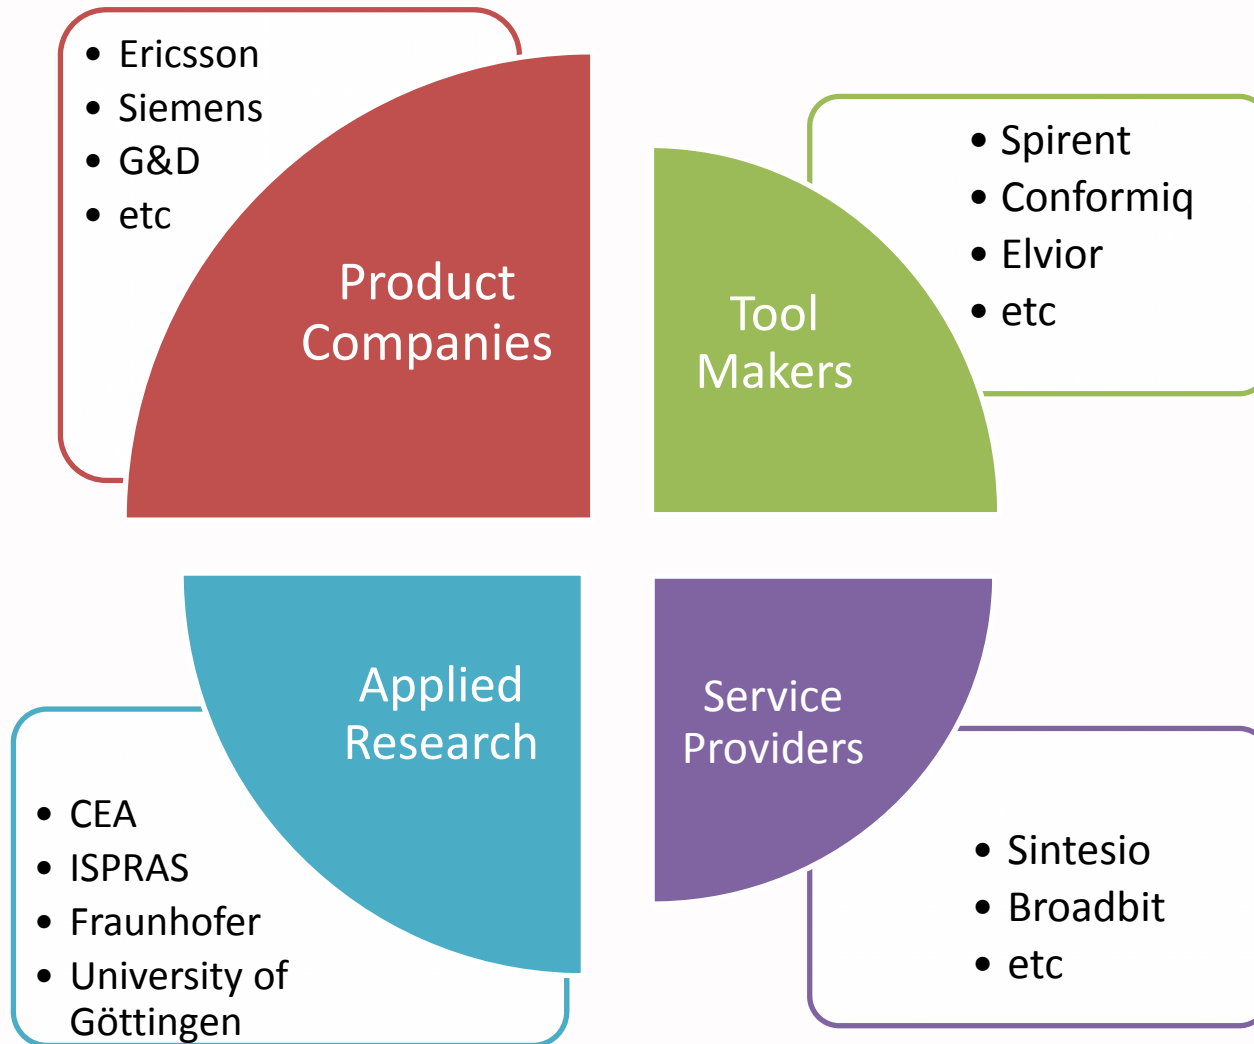

- Initiator of the UCAAT

What is ETSI TC MTS Standardizing?

User Conference on Advanced Automated Testing
