

Conformiq Background

- **Founded in 1998 in Finland**
 - Originally as testing services
- **Software & support services**
 - Conformiq 360° Test Automation Software
 - 3rd generation of software
 - General purpose automated test design and execution acceleration tools
- **Worldwide locations:**
 - San Jose, CA, USA (HQ)
 - Helsinki, Finland (R&D)
 - Bangalore, India (R&D)
 - Paris, Hyderabad, Toronto (sales & support)
- **Partner with SDLC tool providers and testing services companies**
- **Customers worldwide**
 - Fortune 100 Enterprise & Networking markets
 - BFSI, Telecom service providers

Automation MUST enable system testing at the speed of development

- **Increase productivity: Lower cost**
 - Automate functional test design (and re-design)
 - Automatically generate test scripts for automated execution
 - Leverage existing test assets – test cases, requirements, prototypes
 - Eliminate test automation backlog
- **Increase and optimize coverage: Reduce defects**
 - Thoroughly test complex systems with a minimum of test cases; optimize regression test suites
 - See generated tests, what they cover, and why they're needed; gain visibility into what has been tested and what has not
 - Automatically document all test cases versus requirements
 - Generate documentation in the format and language needed
- **Integrate the test flow: Shorten time to market**
 - Tightly integrate with all STLC tools and processes
 - Directly link to automated execution frameworks

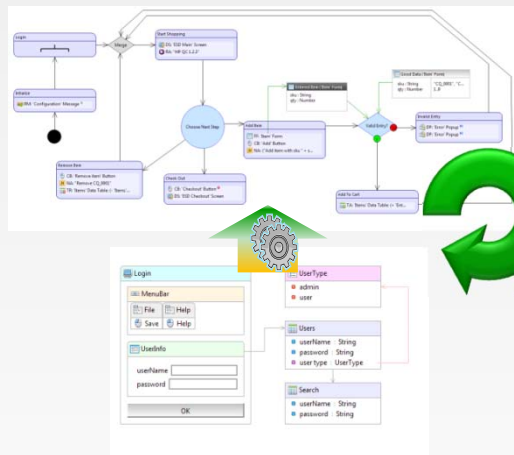

Then Add Conformiq 360° to Automate Test Design & Execution

Conformiq 360°- Automate Test Design in 3 Easy Steps

1

Streamlined Graphical Model Capture of Requirements

2

Automatic Test Design with One Button Click

3

Transform Generated Tests for Automatic Execution & Full Documentation

The testing framework for repeatable consistent: Control, Visibility, Automation, Integration & Speed

Conformiq 360° Users *Eliminate*

- X *Manually* designing and maintaining test cases
- X *Manually* optimizing the minimum number of test cases
- X *Manually* writing executable test scripts
- X *Manually* determining correct test results
- X *Manually* determining test case impact with every change
- X *Manually* maintaining requirement traceability
- X *Manually* writing test documentation
- X *Manually* transferring information between STLC tools
- X *Manually* optimizing regression test suite
- X *Manually* scripting automated execution tools

For continuous testing at the speed of agile development

Automated Testing at Agile Speed is ... Conformiq 360° Test Automation™
