SPIRENT TTworkbench Phy I/O

Make testing the Internet of Things simple, safe and secure

The Spirent TTworkbench Physical I/O is the Internet of Things (IoT) in a miniature format. It showcases how components of the IoT can be automatically tested.

Highlights:

- Testing the interoperability of components characteristic for the Internet of Things
- Focus on increasing flexibility and simplification of testing the Internet of Things
- Simulating the machine behaviour by testing of the components with an all-embracing approach

THANK YOU VERY MUCH !

**If you have any questions,
please don't hesitate to contact me.**
